run out of dessert!

www.Angels4Taegan.com

Taegan is a beautiful 7 year old little girl who was diagnosed in 2006 with cerebral palsy, periventricular leukomalacia, autism, as well as a genetic disorder called duplication of 8p23.3. She is significantly speech, physically and academically delayed. Daily she attends special needs classes and is involved in speech, occupational, physical, craniosacral and music therapies.

With your help, our mission is to raise enough money for Taegan to be seen by an autism specialist for biomedical treatments. A typical 18-month biomedical treatment program costs approximately \$14,000 here in the United States. These treatments are not covered by insurance. We are asking you to join us in making this a reality for Taegan.
